1. (Twice Amended) A flexible container comprising:
a plurality of panels joined together to form a sleeve, the panels each having an end edge that cooperate to define an imaginary plane at one end of the sleeve; and
an end panel connected to the panels at the one end of the sleeve, the end panel having at least one portion extending outwardly from the sleeve beyond the imaginary plane when the end panel is in an unfolded position;

wherein the plurality of panels and the end panel are configured and arranged to define an interior volume of the flexible container of at least about 200 liters.
